Installation instructions for SD 300

Transparent roller blind

1. Take the rotating blind bracket and place the fixing screw through the centre.

2. Place screw into pre drilled hole. all pre drilled holes should be centrally aligned to one another for the fixing position.

3. Ensure fixing screw is totally tightened and secure.

4. Check that brackets are secure and centrally aligned to one another.

SD 300

Transparent roller blind

5. Rotate the bracket so that the push clip is opened fully and offer the blind into this.

6. Ensure the blind mounting bar is flush to the top substrate and slowly push the push clip.

7. Continue to push the clip into position.

8. Clips are completely pushed back flush to the mounting bar of the blind.
